

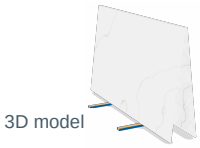
DOUBLE-SIDED A-FRAME RACK

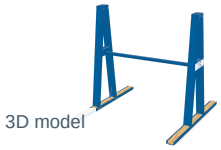
Heavy-duty slab A-frame · storage on both sides · 44,000 lb (20 t)

PRODUCT OVERVIEW

Two A-frames joined by a removable crossbar hold slabs on both faces of one footprint. The channel-steel feet take wood inserts, so the slab edge sits on wood. Powder coated in Next Level blue and shipped knocked down in a carton.



A slab on each side



Empty frame

44,000 lb	2 sides	56.7 in	121 lb
factory rating (20 t)	19.7 in (500 mm) deep each	frame height (1,440 mm)	self weight (55 kg)

KEY FEATURES

Wood under the slab edge

The channel-steel feet carry wood inserts, so slabs stand on wood. Replace an insert when it wears.

Both faces

Slabs lean on both sides of the same rack; load the two sides evenly.

Knocked down

Ships flat in a carton and bolts together on site; the crossbar lifts out.

Plan for the slab

With one 137 × 78 in slab per side the rack is 137 in (3,480 mm) long, as in the 3D model.

Next Level blue

Powder coated RAL 5017 blue, the same as every Next Level A-frame.

Stage at the machine

Keep the next slabs beside the saw, CNC or polishing line, reachable from both sides.

IDEAL APPLICATIONS

- Slab staging at the saw, CNC or polishing line.
- Showroom and yard display of full slabs.
- Fabricated pieces between steps.
- Aisles reached from both sides.

DOUBLE OR SINGLE?

Choose the double-sided rack for access from both sides of an aisle, the single-sided rack for one deeper face against a wall.

DETAILS AND SPECIFICATIONS

Double-Sided A-Frame Rack · technical data

RACK

Length × width × height	59.1 × 58.9 × 56.7 in (1,500 × 1,495 × 1,440 mm)
