TELESCOPIC FORKLIFT BOOM

Heavy-duty fork-mounted telescopic jib · up to 3,300 lb (1.5 t)

PRODUCT OVERVIEW

A telescopic boom that slides onto the forks and turns a 3–7 t forklift into a yard crane for slab bundles, crates and equipment. Four boom positions trade reach for capacity; a swivel hook hangs from the boom end.

3,300 lb	87–134 in	3–7 t	243 lb
max. capacity (1.5 t)	telescopic (2.2–3.4 m)	forklift class	self weight (110 kg)

KEY FEATURES

Forks in. Reach out.

Slide the forks into the pockets, secure the boom to the carriage and set the length.

Four positions

The shorter the reach, the more it lifts: 1,100 to 3,300 lb (0.5–1.5 t) by position.

Swivel hook

Swivel safety hook on a shackle at the boom end.

Safety yellow

Easy to see in the yard.

Telescopic

The inner section slides out from 87 to 134 in (2.2–3.4 m) and is pinned in one of four positions.

Fork pockets

Two 7.1 × 3.1 in (180 × 80 mm) pockets take the forks of a 3–7 t forklift.

IDEAL APPLICATIONS

- Slab bundles and crates in the yard.
- Placing machines and heavy parts.
- Loading and unloading trucks.
- Reaching over racks with a matched forklift.

TWO LOAD CHARTS

Use the capacity marked for the boom position and the forklift's own load chart with the boom fitted; the lower of the two applies.

DETAILS AND SPECIFICATIONS

Telescopic Forklift Boom · technical data

Swivel hook at the boom end

Extended: position holes and hook end

BOOM

Length	86.6–133.9 in (2,200–3,400 mm), telescopic

Before you order: Confirm the forklift class (3–7 t), its forks against the 7.1 × 3.1 in (180 × 80 mm) pockets and its load chart with the boom fitted. Factory data, 2026 (proforma invoice, drawings, data sheets and quotations). Capacities are the factory's ratings for the product itself; your floor, lifting equipment and loading method must suit the load. U.S. values first, metric in brackets; added conversions are approximate. Specifications are subject to change without notice.
